### State Level Events

Quiz Contest

Poster Making

#### General Rules for the Competitions:

1. Registration: 09:00 – 09:30 am (Sharp). There will be no registration fee.
2. Each college should send entry of a team of three students for Quiz Contest and two students for Poster Making before 21.04.2022 at [tejpalsharmadsc@gmail.com](mailto:tejpalsharmadsc@gmail.com).
3. Each team must have an authority letter duly signed by the Principal of their institute.
4. In quiz, if the number of teams exceeds more than eight, a screening test will be organized.
5. Only UG students can participate in both competitions.
6. Questions will be asked from UG level, however, some questions may be asked to test geographical as well as environmental studies aptitude and recent geographical issues.
7. In case of any discrepancy the decision of the quiz master/ judges will be final.
8. For any query kindly contact Dr. Tejpal, Assistant Professor, Department of Geography (+91-9416912640).
9. First three teams in Quiz and poster Making will be awarded.
10. The winner teams (1<sup>st</sup> & 2<sup>nd</sup>) of quiz contest will be eligible for participating further in Inter-State Level Geography Quiz Contest to be organized by Association of Punjab Geographers.
11. No TA/DA will be given by the host college.

2	Second	Komal	R.K.S.D. (PG) College, Kaithal
		Lalit Kumar	
		Sunny	
3	Third	Anjly	Govt. College for Women, Karnal
		Priya	
		Swati	

### Event 3- Extension Lecture on the Theme “Climate Change- A Challenge to Environment Sustainability”

**Venue: Seminar Hall**

**Resource Person: Dr. M.S. Jaglan, Professor, Department of Geography, Kurukshetra University, Kurukshetra**

A very thought provoking lecture on “**Climate Change- A Challenge to Environment Sustainability**” was delivered by Prof. M.S. Jaglan. He emphasized that despite widespread agreement among scientists, climate change has become one of the most hotly debated and perplexing issues of our time. Further, he addressed that the Earth is warming at an unprecedented rate, and it is unknown how various climate processes such as monsoon rainfall will change in response to this warming. In the past, Earth has witnessed warmer and colder periods than present. Past history of Earth’s climate can help us better understand the future changes in climate processes in projected warming. He warned the audience about the impact of climate change on agriculture sector and water resources. Further, he elaborated that how the rise in the sea level can become a challenge to coastal cities. The Boreal forest facing challenges due to the climate change was also explained thoroughly. Prof. Jaglan, also addressed the questions like ‘Rainfall and elemental isotopes: How are they related? Would you believe that the Thar desert in Northwest India was once a densely populated region? How can the ocean bed be used as an archive of past climate changes? How are the ‘natural climate experiments’ recorded in lakes and oceans? Could climate change have caused ancient civilizations to collapse? How close are we to a climate catastrophe on this warming Earth? and so on.
